1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lange et al in view of Nijhoff et al and Rigler et al as set forth in paragraph no. 5, Paper No. 20071126.

3. Applicant's arguments filed March 3, 2008 have been fully considered but they are not persuasive. Although Lange et al does not disclose the use of the claimed CMC in a fruit-based product, as applicant argues, both secondary references suggest using CMC in such products. Whereas the CMC's of Rigler et al are different than those claimed by applicant, as applicant contends, Rigler et al is still analogous to and properly combinable with Lange et al since both are concerned with the use of CMC in food products. However, applicant's claimed CMC's are shown by Lange, the primary reference. Applicant's comment with regard to Nijhoff et al (page 5, 3d paragraph of remarks) conflicts with what applicant is claiming. If a CMC having a DS of 0.6 makes the CMC less suitable in aqueous media, then how does applicant explain the fact that such a DS is actually claimed by applicant in claim 6? Further, Nijhoff et al discloses the use of CMC's having a DS of 0.6 in marmalade, a fruit-based product. Finally, applicant's comment concerning the G'/G'' limitation in claim 1 is without merit since this limitation is disclosed by Lange et al.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
